Honolulu Chapter

President's Message

Susan Shepard

Aloha everyone! It is a new year and your AITP is off to a great start. On January 20th we joined with ISSA for a presentation on networked enabled forensics. There was a live demonstration showing how simple it is to add a system administrator log on and take over a system—and how little is left on your system to identify the attack. Makes you think about disconnecting from the Internet!

Some of the other topics we will be presenting this year include Change Management, Web Services, PDAs and Cell Phones, Desktop Management, GPS Applications and Linux in the Business World. Remember our meetings have shifted to the second Thursday of the month at the Hales Koa. For June we are looking at a site visit—so stay tuned.

As part of our outreach to the community, AITP will be participating in the Hawaii Business College Career/Job Fair on January 30th. Hopefully our real world experience will help folks understand the opportunities in IT.

Your Board of Directors is working hard to make AITP an organization that works for you. We are

always open to your ideas and input, so please don't be shy in letting us know what you would like to see. I am looking forward to being your President and I wish you all a happy and prosperous 2006!

Chapter News

New Members

Please welcome the following new members of the chapter:

- Erik Grubb, Cades Schutte LLP
- Rian Tatsutani, Cades Schutte LLP
- Arthur Garbiso, PREL

You are about to install new software and computers to support new business applications that will lead to increased sales and productivity. And you thought that getting rid of the old computers was easy. Whether you donate, sell to employees, return equipment to vendors or just drive a screwdriver through your hard drive, there is a growing and critical need to protect your company, your customers and the environment when getting rid of old computers. What should you do?

We will explore the current flurry of laws and regulations that surround the disposal of computers. We'll discuss what alternatives are available and what steps you can take to ensure that your data is properly sanitized and your computers are properly disposed of to avoid legal and criminal exposure.
